

# Qualidocs™ for FrameMaker

## Quality Assurance for Adobe FrameMaker Documents

<p><b>Control document quality</b></p> <p><b>Produce valid documents</b></p>	<p>Apply Live Linx Qualidocs to produce more consistent, more accurate, more reusable documents in significantly less time. Avoid mistakes in documents.</p> <p>Qualidocs delivers powerful control over your authors and content in Adobe FrameMaker. Enforce standards across your organization.</p> <p>Qualidocs automatically verifies and, where possible, automatically repairs FrameMaker documents. Qualidocs is rule-driven. Specify different sets of rules for different types of documents, projects or clients.</p>	
<p><b>Qualidocs meets real-life needs</b></p>	<p>Qualidocs works with your Adobe FrameMaker templates. Qualidocs requires no special tools or training, is easy-to-use, and requires no IT support. Write a rule once and enforce the rule on many documents.</p>	<p><b>Measure Your Document QA Quotient</b></p> <p>Does your organization have or need documentation standards?</p> <p>Do you need an easy way to enforce document quality?</p> <p>Do you need predictable content for automated conversion to HTML or XML?</p>
<p><b>Big Benefits</b></p>	<p>Automate and dramatically increase document production speed while ensuring consistency.</p> <p>Improve formatting reliability.</p>	<p>Do you need a solution without waiting for approval of mega budgets?</p> <p>If you answered Yes to the above questions, then Qualidocs is your solution.</p>
<p><b>Flexibility</b></p>	<p>Need to enforce quality for many different types of documents? Qualidocs supports different rule sets for different document types, FrameMaker templates, accounts and more. Allow individual users to activate specific rules or rule sets!</p>	
<p><b>Scalability</b></p>	<p>Qualidocs supports solo writers, or large groups of editors and other staff working at multiple locations. Decide on a rule once and then enforce the rule for many users in any location.</p>

## Qualidocs – QA with Reach

<b>Typesetting</b>	Qualidocs rules enforce typesetting conventions, including: eliminating multiple hard returns; excessive spaces; appropriate typesetting characters including ellipses, Em dashes, En dashes, quote marks, inch & foot ticks, etc.
<b>Formatting</b>	Validate document for required styles, such as captions. Check for non-standard styles. For each required style, optionally define whether there must be exactly one instance or at least one instance. Hierarchy and order of styles can be validated.
<b>Bullets and Lists</b>	Qualidocs automatically validates bulleted lists and numbered lists. List items that don't conform to requirements can be automatically styled.  Heading paragraphs can be automatically identified and verified.
<b>Search and Replace</b>	Automatically replace common errors, out-of-date names and awkward usages. For example: replace "A" with "B", validate acronyms, check that jargon has been defined, and more.
<b>More Rules!</b>	Additional rules may be created and plugged-into the software. Existing rules may be edited or disabled at any time.

### Expandability

Qualidocs works with powerful optional add-ons such as Live Linx ConteX and WebWorks Publisher.

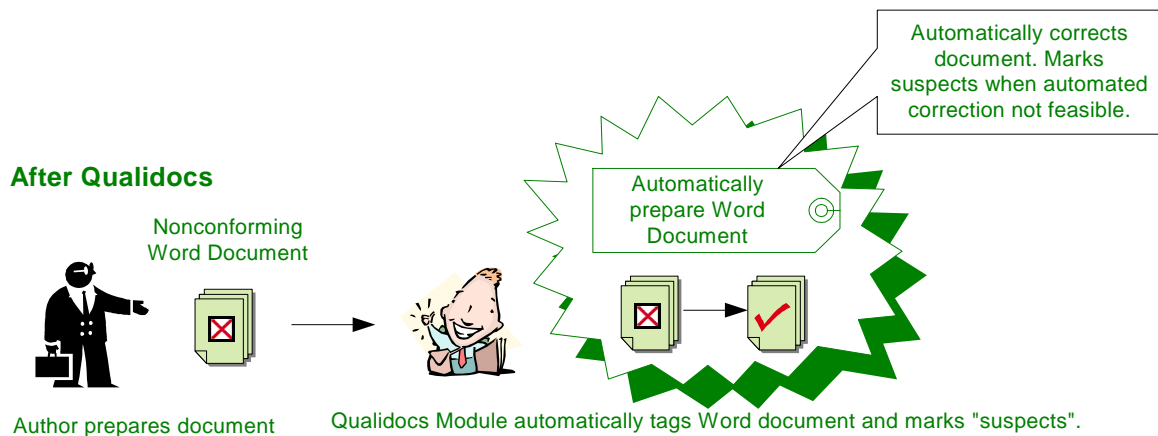

### Requirements

Adobe FrameMaker. Mekon FrameAC. Administrator requires Microsoft Access 2000 or later in order to add, edit or delete rules.
